Chemical URBan Supersite for Improved Environment

Nafplio 31/10-1/11 2014

Projects – New, submitted or planned to submit

Implementation of measurements and analyses of environmental indices for "atmospheric quality" along the Egnatia Highway (N. Greece), 2015, (PI for NOA, budget NOA 60 k€, total 90 k€) ... approved-to be signed

Establishment of hydrometeorological network at Hydroelectric Stations of the Hellenic Public Power Corporation, 2014-2015 (PI for NOA, budget NOA 20 k€, total 280 k€) ... implemented

H2020 – GEO-GRADLE (waiting)

H2020 – CityLab – (passed to the second level of evaluation)

LIFE – UCCA (coord. Univ. of Patras)

LIFE – ALISEOS (coord. Univ. of Florence)

LIFE – AQ-SENSE (coord. Cyl)

LIFE – MAINALO (coord. DataGRID, local authorities)

Other – Educational

• 2015: Coordinator of Course B1 "Environmental and Remote Studies for Cultural Heritage" M.Sc. in Cultural Heritage Materials & Technologies (<http://culttech.uop.gr/index.html>)

• 2015: Coordinator of Course "Earth System Science" M.Sc. Space Research and Applications

Both cooperation between NOA and University of Peloponnese

Main publications (W:write, C:coordinate, P:participate)

Understanding physical and chemical processes in the atmosphere, seizing the opportunity provided by near environment. It is our mission to promote world-class atmospheric research in the area by providing to interest and increasing social relevance. We are active in the fields of aerosol research, air quality, solar approached from a synergistic view angle that combines multiple experimental, observational and theoretical

GROUP PROJECTS

2014 - December 31, 2017
Marco Polo - Air quality Monitoring and Forecasting in China

Project partners: (1) Royal Netherlands Meteorological Institute (NL) (co-ordination), (2) Aristotle University of Thessaloniki (GR), (3) Belgian Institute for Space Aeronomy (BE), (4) Danish Meteorological Institute (DK), (5) Democritus University of Thrace (GR), (6) Finnish Meteorological Institute (FI), (7) Institute of Atmospheric Physics (China), (8) Inmarsat (ES), (9) National Observatory of Athens (NOA), GR, (10) National Satellite Meteorological Center (China), (11) Netherlands Organization for Applied Scientific Research (NL), (12) Peking University (China), (13) Tsinghua University (China), (14) Flemish Institute for Technological Research (BE), (15) London Metropolitan University (U.K.)

APCG participation: V. Amiridis, S. Kazadzis, E. Marinou

Findings: EP-SPACE-2014-1

EMM - Intelligent urban mobility management and traffic	Pyrometeor by LEVAP - Laser experiment of the Chemistry of Vertical of clouds and air	4 XENON - Climate change impacts on the Borealistic development of	AERONAP - Global mapping of aerosol properties using neural	HYPERX - Verification of the Hyperspectral Plant Imaging
ACT - Aerosol and G. ACEMED - Evaluation of influence on global surface UV irradiance classification scheme				

NEW ARTICLE: Fire risk, atmospheric chemistry and radiative forcing assessment of wildfires in eastern Mediterranean
